

Tulisa Wasa

Front-End Developer

Phone: 082 043 9657 | Email: tulisa.wasa@gmail.com | Location: Tembisa, Gauteng | LinkedIn: <https://www.linkedin.com/in/tulisa-wasa/>

PROFESSIONAL SUMMARY

Experienced Front-End Developer with 4 years of hands-on experience building scalable, responsive web applications using React, Next.js, Angular, and TypeScript. Proficient in integrating RESTful and PostgreSQL APIs, optimising UI performance, and delivering measurable business impact — including 40% user engagement growth and 50% reduction in page load times. An agile practitioner comfortable with Jira, Git, and cross-functional team collaboration. Passionate about clean, accessible code and exceptional user experiences.

CORE SKILLS

Front-End: React, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3

Back-End Integration: RESTful APIs, PostgreSQL API, .NET APIs, C# (reading & integration), NodeJS

Databases: PostgreSQL, SQL Server, MySQL

Tools & Technologies: Git, GitHub, Jira, Visual Studio Code, WordPress, Elementor

Testing & Performance: Debugging, cross-browser compatibility, responsive design, basic accessibility (WCAG)

Methodologies: Agile, Scrum, sprint planning, daily standups, team collaboration

WORK EXPERIENCE

Front-End Developer (Portal) | Providence Software Solutions | October 2021 – Present

- Developed and maintained front-end applications using React and Next.js, boosting user engagement by 40%.
- Collaborated with back-end developers to integrate PostgreSQL APIs, ensuring seamless user experience and data functionality.
- Optimised SQL queries and schemas with back-end teams to improve data delivery performance.
- Utilized Jira to detect, log, and report bugs, driving timely resolution and a 99.9% uptime rate.
- Led front-end development using HTML5, CSS3, and JavaScript, improving website performance by 30% and reducing page load times by 50%.
- Built responsive, accessible front-end interfaces using Angular, TypeScript, and React for enterprise-level applications.
- Translated design mockups and UX requirements into clean, responsive, and accessible code.
- Participated actively in Agile ceremonies, including daily standups, sprint planning.

Web Developer | Providence Software Solutions | October 2020 – September 2021

- Managed bugs and project tasks through Jira, decreasing delivery delays by 20%.
- Developed custom UI components using Angular Material, significantly reducing development time.
- Integrated RESTful APIs with Angular front-ends for dynamic content rendering.
- Debugged front-end issues across devices and browsers, ensuring cross-browser compatibility and responsiveness.
- Collaborated with designers and QA testers to ensure UI/UX alignment and product stability.
- Maintained Git version control with frequent code reviews and CI pipeline support.

PROJECTS

FTTHSA Fiber Portal | React, Next.js, PostgreSQL API, TypeScript, JWT 2023 – 2025

- Developed a secure customer portal with real-time API data fetching and JWT token-based user authentication.
- Created product, profile, and subscription management components to enhance user interactivity.
- Integrated PostgreSQL API calls to retrieve and display products dynamically, ensuring fast and secure data fetching.

SKI Civil & Building Contractors Website | HTML5, CSS3, JavaScript, Bootstrap 2023

- Designed a fully responsive business website with optimized UI/UX, applying mobile-first principles and lazy loading.
- Developed service and project showcase pages using modern web technologies, improving user engagement and navigation.
- Optimized performance through lazy loading, reducing initial load time by 40% and improving user retention.

PROJECTS
